Dmitry Lvov

Machine Learning Researcher

Medical imaging, human attention and clinical model evaluation.

d.lvov@innopolis.ru | lvovdmitro.github.io | Google Scholar | GitHub

Research experience

Innopolis University
Oct 2023-present

Researcher, Medical AI | AI in Medicine Lab

- Develop and test methods for radiology report generation and attention prediction. Proposed SCFR and led its research and writing; co-developed LogitGaze-Med.
- Work with radiologists to define research tasks and evaluation protocols and investigate model failures.
- **Student supervision.** Guide students through problem formulation, code review and manuscript preparation. Originated two clinical evaluation studies with student first authors; wrote the EHR paper and designed the prenatal study's experiments.

ITMO University
Dec 2024-present

Engineer, part-time | Mind Lab

- Built a multimodal document pipeline for technical question answering: element detection, figure-caption matching and vision-language descriptions. This work formed the basis of my master's thesis and a first-author IEEE Access paper.

Selected research

NeurIPS 2026 · main conference — First author

SCFR: controlling historical context in radiology reports.

NeurIPS 2025 · main conference — First author

LogitGaze-Med: predicting radiologists' gaze with vision-language model semantics; testing predicted gaze as supervision for diagnosis.

NeurIPS 2026 · TAE workshop — Second author on both

EHR model selection; clinical risk and referral workload. Student first authors.

ICLR 2025 · workshop — First author

LogitGaze: predicting human attention with vision-language models.

TAE: Can We Trust AI Evaluation? ICLR: Reasoning and Planning for Large Language Models.

IEEE Access: document QA (2026); uncertainty estimation and cardiometry (2025).

Education

ITMO University
2024-2026

Master's degree with honours in Applied Mathematics and Computer Science

Big Data and Machine Learning. **ITMO Best Graduate 2026.**

Kazan Federal University
2020-2024

Bachelor's degree in Applied Mathematics

Skills and activities

Python, PyTorch, Transformers, scikit-learn, Docker, ClearML, Git, Linux.

Academic service: Reviewer, NeurIPS 2026.

English: IELTS Academic 7.5 (Nov 2025). Track and field: university team member; regular competitor.
